Projects

Lightspeed - Software (2026) – HTML, CSS, JavaScript;
Inspired by Apple's Universal Clipboard and Handoff to solve the incompatibility between Windows and macOS clipboards with Electron and ngrok

MetaTune - Song File Converter (2024-2026) – Java;
Converts blank MP3 files, using metadata tagging with Mp3agic, into presentable files that blend in with real songs in your Apple Music library using FlatLaf and Java Swing

Personal Portfolio Website - All Projects Shown (2026) – HTML, CSS, JavaScript;

Prospecting Chance Calculator - Game Logic Aid (2025) – Java;
Calculates game logic to aid players in a popular game called "Prospecting!" helping 100+ players progress significantly faster

Rush Hour - Game (2023 - Ongoing) – C#;

Players race against the clock through realistic driving and precision parking challenges. Integrated leaderboard, economy, authentication, and DB system using Unity's SDK.
